ABSTRACT

This annotated bibliography describes 159 of the books for children that are available through the Government Printing Office (GPO), including coloring books, picture-story books, activity books, comic books, and readers. Publication dates range from 1944 to 1990. The books are arranged according to the government agency that issues them. Brief annotations describe the content and format, and intended age groups are indicated whenever this information appears in the publication. Topics of nonfiction works include alcohol and drug abuse; babysitting; teenage parenting; nutrition; acid rain; the environment; making things from junk; traffic safety, and stamp collecting. Fiction includes Native American folk tales. An attached resource guide provides information on how to obtain copies of the publications, including a list of all government depository libraries in Florida and the addresses of the Florida GPO bookstore and the Superintendent of Documents. Also listed are resources that can be used for locating the addresses and telephone numbers of government agencies that issue the children's books. It is noted that these agencies may make publications available in bulk quantities. (KRN)

Children's Books from the U.S. Government Printing Office:
Annotated Bibliography and Resource Guide for Librarians.

Introduction.

Books illustrating the natural beauties of our national parks, the dangers of environmental pollution, the prevention of disease, the glory of space flight, the evils of discrimination, and the importance of a healthy diet are just a few of the subjects found in the myriad of books, pamphlets, and brochures that are printed each year by the U.S. Government Printing Office (GPO).

Though educators, librarians, and other information specialists may come in contact with government documents, few realize that many of these materials are aimed at children. Indeed, government-sponsored books for children are an important, though under-utilized resource. And as a window into our past and our present, the children's books document the social, cultural, and political concerns of the times.

Over the years, one of the agencies of government, the Library of Congress (LC), has been a leader in compiling book lists and recommending books for young readers, and to its credit are several series devoted to doing just that: among them, Discoveries, Books for Children, For Young Readers, and Braille Book Review.

Although LC publications deal with children's literature, the intended audience generally has not been the child, but rather, the teacher, parent, librarian, or school administrator with an interest in acquiring books and magazines for children. Perhaps less known is the fact that government agencies other than LC also have, from time

to time, designed, published, and sold to the public books targeted to children of all ages.

A review of children's books distributed by the Government Printing Office between 1944 and 1990 reveals a wide range of subjects, from preventing drug abuse to promoting personal hygiene. For example, the Environmental Protection Agency designs coloring books to stimulate an interest in ecology, the National Institute of Education publishes story-books that are culturally sensitive to native American Indian children, and the National Highway Traffic Safety Administration prints booklets on traffic safety.

Not all government books have such lofty themes. One charming booklet issued by the Postal Service, entitled, A coloring book story about Mary and Johnny's letter to their grandparents, includes space for children to design a postage stamp and many pages of illustrations for coloring.

This bibliography contains a sample of government-sponsored books for children, including coloring books, picture-story books, activity books, comic books, and readers. The books are arranged by agency; brief annotations describe content and format, and intended age groups are provided whenever this information appeared in the publication. In addition, Superintendent of Documents call numbers appear in brackets [] at the end of each citation to facilitate inter-library loans and inquiries from the Government Printing Office or from the national network of GPO book stores. For additional information on how to obtain copies of publications listed in the annotated bibliography, please refer to the attached resource guide.

Resource Guide for Librarians.

This section is aimed at librarians in schools, colleges, universities, or public libraries who wish to identify sources for acquiring government publications, and includes a list of Federal Depository Libraries in Florida plus information on how to acquire federal documents from GPO bookstores.
